

Yes your 6012 is definitely a Thomson  
& Taylor car - the 60 tells me. Later ones were  
80 and gradually altered slightly.  
Production stopped at end of 1930, with only  
a few competition cars being built up out of  
mostly pre-1930 components. ALL the chassis  
frames were delivered to Riley before the end  
of 1930 B in 1931/2

An airtel should not contain any enclosures
